4' sidewalls and doors
14Ply tires
Hydraulic jack
Watchdog Command*
Rumble Bed**
Pro Package**

Watchdog Command:

Watchdog Command is an app-based system that is pre-wired on every Watchdog dump trailer. When Watchdog Command is added to our trailers, (either at the factory or purchased from a dealer with our easy plug and play installation) the operator can now monitor the battery levels, test the running/ brake lights, and operate the hydraulics (jack also if hydraulic jack is added) from an easy to use and safe app on any cell phone.

Watchdog Command also has several add-ons which are mostly plug and play such as: tire pressure monitoring system, back-up camera, and GPS.

We always have our cell phones on us. Why not make it work for you?!

Rumble Bed:

If you've hauled dirt or sand, you know after you drive across town and its had time to settle, the material likes to stick in the bed even with the steepest of angles, especially when damp or wet! Our new Rumble Bed technology has been used in the tractor truck industry for years and we are bringing it to the commercial/residential users. Next time the trailer is at maximum height and the material wants to stick, don't grab a shovel but hit the Rumble Bed button and watch the trailer vibrate the load right out! This handy feature will pay for itself in no time!

Pro Package:

The Pro Package option is our top-of-the-line dump trailer. With **Watchdog command** you can safely and easily operate and monitor the trailer from your cell phone. With **Rumble bed** you can save time by shaking out the dirt when the trailer is lifted, and with our **Light Package** you can see the ground when its dark, light up your workspace, and warn others when you're backing up. The Pro Package also comes with our marine grade Bluetooth job site speakers.
